

## HOW TO FIT...

# HOOK AND BAND HINGES

**1.**

Position bands so they are parallel and central on the rails of the gate and the eye of the hinge band will be central to the gate post and mark fixings holes

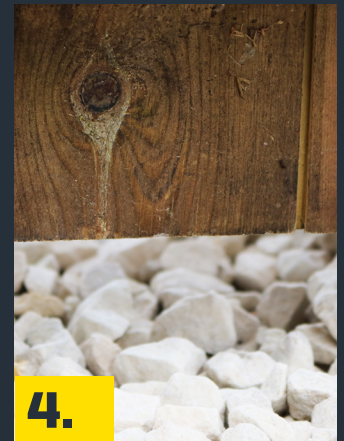

**2.**

Drill hole for carriage bolt and fix with fixings provided.

**3.**

Drill pilot holes for screws and fix with fixings provided.

**4.**

Position the gate in into the frame and support allowing correct clearances from floor through the opening and the frame posts.

**4.**

Insert the hooks into the bands and position on the gate post and mark fixing holes.

**5.**

Drill pilot holes and fix the hooks with fixings provided.

**6.**

Check gate / door opens and shuts without any catching.
